

Grapple Buckets, Forks and Rakes

for Skid Steer, Multi Terrain and Compact Track Loaders

Cat® industrial grapple buckets, rakes and forks are designed to easily handle a wide array of bulky, irregularly shaped objects encountered in demolition, industrial, construction, recycling, storm debris clean-up, landscaping and other aggressive applications.

Features

- Two top grapple clamps operate independently
- Top clamps operate over an arc of 90 degrees
- Deep flat floor/fork construction
- Different width available
- Constructive design profile (bucket and fork)

Benefits

- Provides the ability to clamp and retain differential loads, e.g. paper, plastic, tyres, greenwaste, bales, etc.
- Improved loadability ensuring maximum capacity.
- High rated capacity, increasing productivity.
- Matched capacity to application, delivering efficiency.
- Enhanced performance.

Grapple Buckets, Forks and Rakes

for Skid Steer and Multi Terrain Loaders

Utility Grapple Buckets and Forks.

Designed to handle light, hard to handle materials encountered on a farm, ranch or landscaping project. Grasping materials such as loose hay, straw, bedding materials, dry compacted livestock waste, landscaping mulch and pine straw.

Industrial Grapple Buckets.

Ideal for grasping objects such as railroad ties, trees, large rocks, brush, industrial and demolition scrap, and recycling debris. For demolition, industrial, construction, recycling and other aggressive applications.

Industrial Grapple Forks.

Piercing and grasping paper, cardboard, wood and light gauge metal scrap. For demolition, industrial, construction, recycling and other aggressive applications.

Industrial Grapple Rakes

Ideal for storm debris clean-up and land clearing applications due to their open floor design which allows unwanted material to filter out through the tines while the grapples clamp firmly on the debris.

A Width*	mm	1829	2134
B Height,	mm	838	838
C Jaw Opening	mm	940	940
D Length	mm	1016	1016
Weight	kg	467	515
Number of Tines		9	11

* Measured from inside of side plate to inside of side plate; overall width is approximately 50 mm wider.

** With base cutting edge only, without ground engaging tools.

*** Optional bolt-on cutting edge.

Grapple Buckets, Forks and Rakes

Hydraulic Requirements

Standard flow hydraulics and no electrics.
