

Snow Blower

for Skid Steer, Multi Terrain, Compact Track and Compact Wheel Loaders

Features

Adjustable impeller relief valve

In line impeller

Reversible auger and impeller

Smooth chute design

Benefits

Allows operator to fine tune impeller performance for wet/heavy or light snow.
Allows consistent throwing distance in auger stalling conditions.
Quick recovery time from auger stall condition.

Only draws in as much snow as it can throw, providing the appropriate balance of speed and torque to maximise capacity and throwing distance.

Allows operator to expel obstructions without exiting machine.

Non metallic liner to prevent freezing up and blocking
Deep chute produces smoother, more controlled stream of snow.
Design eliminates ledges to prevent bridging and blocking
