* 1500 kg models with TREV5400 mm mast, 2000 kg model with 6300 mm mast

** without / with stabilizers extended

$A_{st} = Wa + x + l_6 + a$ $l_6 =$ Pallet length (800 or 1000 mm)
 $A_{st} =$ Working aisle width with load $b_{12} =$ Pallet width (1200 mm)
 $a =$ Safety clearance (200 mm)

Lower Cost of Ownership

- Smooth, progressive, easy to use controls and comfortable, adjustable seats enhance operator concentration leading to better shift productivity.
- Durable chassis and mast construction, designed and built for years of service.
- AC-drive technology means longer service intervals, reducing the total cost of ownership.
- Battery discharge indicator (BDI) incorporates lift cut-out for battery protection.

Unmatched Productivity

- These trucks combine efficient long distance travel and stacking at medium heights.
- The 'Initial lift' model (NSS15NI) allows increased ground clearance when working on ramps.
- High drive speed (with or without load).
- Large battery compartment (up to 500 Ah).
- Extendable side stabilizers, standard on models with triplex masts, gives extra residual capacity
- Rapid acceleration.
- Standard PIN code start-up, and driver specific settings.
- Programmable features for driver.
- Regenerative braking feeds power back into the battery.
- LCD display with all relevant information.
- Good service access, thanks to a seat which swings open in seconds.
- Battery roller as standard for quick battery change.
- Progressive steering for excellent maneuvering at low speeds and stability at high speed.
- Smooth hydraulics.
- Rounded fork tips for easy pallet entry, when approaching at an angle.
- High residual capacities, especially with extended side stabilizers.
- Easy to operate driver's menu.

Safety and Ergonomics

- Driver well protected by chassis.
- Ergonomically designed electronic 360° fly-by-wire steering gives precise control at speed.
- Adjustable seat allows for comfortable long-shift operation.
- Good all round visibility and through the powerRamic mast for accurate pallet entry.
- Automatic speed reduction in curves and at increased lift heights, for safe and secure handling.

Options

- Various fork lengths.
- Lift height pre-selector and indicator (NSS20N only).
- Customized side plates (for company livery).
- Pallet entry & exit rollers.
- Choice of different wheel materials.
- Picking list bracket or PC support.
- Key switch start.
- Compulsory lowering of side stabilizers at 2.5 m lift height or higher.
- Extendable side stabilizers on models with duplex masts (for extra residual capacity).
